

hack the valley

SPONSORSHIP PACKAGE

October 13-15 2017 | **UofT Scarborough**

Why Sponsor Hack the Valley?

After our successful launch early 2017, the Association of Mathematical and Computer Science Students (AMACSS) of the University of Toronto at Scarborough is excited to present Hack the Valley II. Together, we want to deliver an amazing experience to over 500 talented students of diverse experiences and backgrounds across North America. With an experienced organizing team of over 50 members, we are looking forward to creating an unparalleled creative and fun experience. This is a great opportunity to help us deliver the best possible 36-hour hackathon, whilst defining yourselves as supporters of innovation and further education.

Focus for Our Sponsors:

Getting our sponsors to the next level. Choose from a variety of sponsorship options that compliment your company needs. Additionally, custom branding opportunities are created on top of the standard packages if requested and feasible. We want YOU as well as our participants to benefit from this event!
